## School Activity Sheet

### Învățarea adaptată nativilor digitali [Learning Adapted to Digital Natives] (2023-2024)

**Ref. no: 2023-1-RO01-KA122-SCH-000119822**

(KA1 - Short-term projects for mobility of learners and staff )

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

**Activity Title:** *Vertebrates*

**School:** Titu Maiorescu Secondary School

**School subject:** English

**Suitable age of children:** 11-12

**Teacher:** Musat Ana – Luiza

#### **Activity objectives (2 or 3):**

- ✓ Students will practice their reading comprehension skills
- ✓ Students will use the Quizziz app, installed on their phones, to develop their digital skills

**Materials needed for the activity:** Internet connection, smart TV, laptop, 30 smartphones (one for each student), Quizziz App on the students' phones

**Activity stages (please briefly explain the process, roles of participants, guidelines, teaching tips, etc., so that other teachers can successfully implement the activity):**

- Create, on the Quizziz website, an account
- Add your students into a virtual classroom

- Create, on the Quizziz website, the questions and the slides that you are going to use during the lesson
- Give the students the title of the lesson (Vertebrate)
- Start to present the lesson with the help of Quizziz. The students will see the slides on both their phones and on the smart TV
- You can enable the live whiteboards for each student, so that they can make notes and underline the key words
- The teacher can focus on individual students' live whiteboards
- The teacher will then present the questions of the lesson. For the purpose of this specific lesson, the following types of questions were used: fill in the blanks, choose the correct answer, open ended questions, word clouds, drawing activities
- The students give their answers in the Quizziz app on their phones, and, at the end of each round, the leaderboard is shown on the smart TV
- The students can see their position in the leaderboard
- There will be a final leaderboard at the end of the lesson
- After the lesson ends, the teacher can go to the reports section from Quizziz, and see what each individual students answered during the lesson

#### **Assessment:**

- Using the Quizziz app, the students answer the teacher's questions and both the teacher and the students get live feedback

#### **Evaluation criteria:**

The lesson is effective if during this activity:

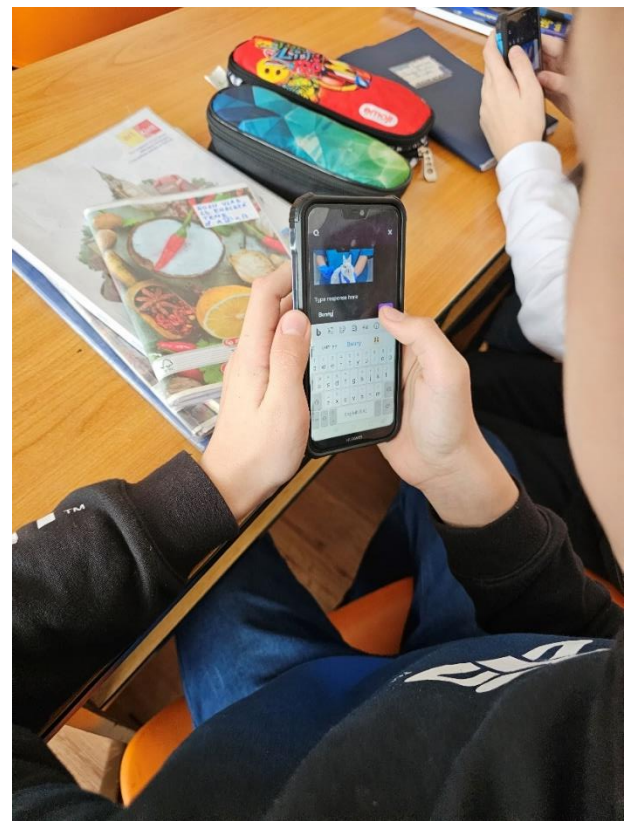

- students become engaged and capable of using the Quizziz app to choose an answer to a given question
- teachers can gauge the effectiveness of integrating the Quizziz app into their teaching practices and assess its impact on student learning outcomes.

### Activity results:

- students learn that Quizziz App is a tool of engagement
- if word cloud questions are used, then students become motivated to express their opinions
- if fill in the blanks questions are used, the teacher can see if the students are able to correctly write their answers
- if open ended questions are used, the teacher can see if the students can give detailed answers

### 1-3 photos of the activity:
